Experience/Projects

EASY MY STORAGE

June 2025 – present

Full Stack Development (Internship)

Noida, India

- Designed and developed a secure **Admin Dashboard** to provide staff with controlled access to customer records, warehouse data, bookings, inventory, and payments.
- Built a **Customer Login & Management System** with secure email OTP verification, allowing users to safely access their personalized dashboard.
- Developed a **Customer Portal** where users can view personal details, pickup schedules, booking history, quotations, uploaded documents, inventory images, and payment status.
- Implemented **complaint management, quotation request, feedback form, and document upload modules** to improve customer interaction and support.
- Integrated **Razorpay Payment Gateway** for secure and seamless online transactions.
- Created a **booking management system** to handle storage requests, scheduling, and order tracking.
- Developed an **in-house MySQL database architecture** for structured storage of customer, booking, inventory, and payment data.
- Implemented **API integrations** between admin panel and client portal to manage and sync customer data across all modules.
- Led a **complete website revamp**, improving UI/UX, layout structure, responsiveness, and performance.
- Performed **SEO optimization and code improvements**, including meta tags, semantic HTML, page speed optimization, and clean code practices.
- Worked extensively with **HTML, CSS, JavaScript, PHP, MySQL, React** to deliver full-stack functionality.

Personal Projects/Awards & Achievements

Smart Farming Web Platform | Web Application Development, API Integration, UI/UX Design

<http://farmpractice.free.nf>

- Developed a full-stack web platform to educate farmers on lesser-known agricultural practices, enhancing knowledge access and practical adoption through expert-led courses.
- Integrated expert profiles, raw material listings, and course purchase options, enabling a seamless learning and e-commerce experience for users.
- Streamlined the user interface for both farmers and experts, improving platform usability and increasing engagement with farming content and expert offerings.
- Stack:** HTML, CSS, JavaScript, PHP, MySQL

Taskify – Employee Management System | Web Application Development, Database Design, UI/UX

<http://Taskify.free.nf>

- Developing a full-stack web application to streamline employee and task management within an organization.
- Designed and structured modules for managing departments, tasks, and individual employee records through a centralized admin interface.
- Implemented CRUD operations for each module with role-based access, ensuring secure and efficient data handling
- Stack:** HTML, CSS, JavaScript, PHP, MySQL

Portfolio Website | Frontend Development, UI/UX Design

https://github.com/vanshika5555/Portfolio_React

- Developed a responsive personal portfolio website using **React.js, HTML, CSS, and JavaScript** to showcase skills, projects, and experience.
- Implemented **component-based architecture** and reusable modules for maintainable code.
- Designed clean, modern UI with smooth navigation and **mobile-first responsiveness**.
- Integrated sections like **About, Skills, Projects, Contact, and Resume Download**.
- Stack: React.js, HTML, CSS, JavaScript, Git & GitHub

Hackathons & Leadership Experience

- **Participant in 5+ Hackathons** – Including BVP-HEX, HackWithMait 5.0, HackCBS 7.0, Matrix 2.0, Code Kshetra 2.0, Code Nakshatra, HackItUp.
- **Core Member, GEEK Room (June 2024 – March 2025)** – Assisted in planning, coordinating, and executing multiple campus-level hackathons and coding challenges.
- **Core Graphic Designer, NEXVERSE (March 2025 – Present)** – Led creative design for promotional campaigns, event posters, and UI mockups for various tech/non-tech events.

Freelance Project

AskManisha Website (Full Website Revamp & Admin System)

<https://www.askmanisha.com/>

- Revamped the entire AskManisha website with a **modern UI/UX redesign**, creating and sharing **10+ Figma design concepts** with the client before implementation.
- Developed a **fully dynamic, admin-controlled website** where every page and section is managed through the admin panel.
- Built modules for **reviews management, numerology, horoscope, kundali, contact queries, blog publishing, event uploads, service pages, about page sections, and 8+ calculators**.
- Implemented a **secure admin authentication system** with role-based access and protected dashboards.
- Developed **customer and query management system** to handle user requests, consultations, and communication efficiently.
- Integrated **payment gateway, email notifications, and form automation** across the platform.
- Implemented advanced **numerology and horoscope logic** supporting daily, weekly, monthly, and yearly predictions.
- Ensured **fully responsive design**, fast loading performance, and panel optimization.
- Performed **SEO-friendly code optimization** including meta tags, structured content, and clean semantic HTML.
